Education

New York University, Tandon School of Engineering Brooklyn, NY
M.S. Cybersecurity *Expected May 2028*
- Coursework: Information Security & Privacy, Network Security, Computer Networking

Rochester Institute of Technology Rochester, NY
B.S. Computing and Information Technologies; A.A. Applied Computer Technology *May 2026*

Technical Skills

Languages: Python, Java, C#, PHP, SQL, JavaScript, Bash
Security: YARA, AFL++ fuzzing, AddressSanitizer, Clang static analysis
Tools & Platforms: Git, Linux/WSL, SQLite, React, Supabase, Docker (basic), Azure (basic), Cloudflare Tunnel

Projects

Smart Antivirus (Python CLI) *Jan 2025 – Present*
- Built a command-line antivirus combining YARA signature rules with heuristic scoring, using a modular scanner design.
- Identified and documented a YARA rule false-positive case and refined detection logic to reduce false alarms.

Software Security Audit: tinybrowse (C, NYU Course Project) *Fall 2026*
- Audited a C codebase for memory-safety bugs using AFL++ fuzzing, AddressSanitizer, and Clang static analysis.
- Triaged crashes to root cause, documented findings, and applied hardening fixes.

Beehive Monitoring App (Senior Capstone) *Spring 2026*
- Built an IoT hive-monitoring web app with React and Supabase to display sensor readings.
- Designed an SMS alert pipeline through an Android SMS gateway exposed securely via Cloudflare Tunnel.

Ashmod: Discord Moderation & Economy Bot (Python) *Sep 2025 – Present*
- Developed a cog-based discord.py bot for an official artist fan server, handling 1,000+ weekly interactions.
- Implemented automod, ticketing, leveling, and an economy system with SQLite persistence.

Experience

Web/Software Developer Intern Jan 2025 – Jul 2025
NTID Technology and Information Services, Rochester, NY
- Developed front-end features on a PHP/SQL backend; automated Python reporting, cutting manual workload 40%.
- Collaborated with 5 developers on bug fixes and UI improvements.

Web/Software Developer Intern May – Jul 2023; Dec 2023 – Feb 2024
Proyección Laboral S.A.S., Bogotá, Colombia
- Built 4+ client websites with HTML/CSS/JS.
- Developed Evamailer, a Tkinter email-campaign tool processing 300+ emails per campaign with CSV data, attachments, and placeholders, saving 15 hours/week.

Peer Tutor Oct 2024 – May 2026
Rochester Institute of Technology
- Mentored 10–15 students weekly in programming and debugging; ran 3+ workshops per semester.

Leadership

President, NTID Offensive & Defensive Research Club Jan 2024 – May 2026
Rochester Institute of Technology
- Led 25+ students per semester in security workshops, research, and hands-on labs; coordinated 5+ events.
